Velory
AI & Automation Intern
Stockholm

Dear Hiring Team,

I'm applying for the AI & Automation Intern role. I met Emma Nordin Forsberg and Sebastian Fuchs at the Velory x 46elks x IkonAI hackathon, and after reading through the job description, I think it's a good fit.

I fly planes in my free time, which means a lot of checklists and procedures, not unlike the structured, repeatable processes this role is about automating. On the technical side, I maintain Hippo Codes on my own, including its CI/CD pipeline.

Would love to talk more.

Best,
Leonard
