Velory
AI & Automation Intern
Stockholm

Dear Hiring Team,

I'm applying for the AI & Automation Intern role. I met the Velory team at the Velory x 46elks x IkonAI hackathon and really liked the energy and how hands-on everyone was about solving real problems – that stuck with me. Now that I've read through the job description, I think it's a great fit.

As you'll see on my resume, I build things end-to-end: I maintain Hippo Codes on my own, including its CI/CD pipeline, and built a LangChain component integrating LLaMA, DeepSeek, and Granite during an internship at IBM Research. I like the structured, admin side of a project just as much as the technical side.

Would love to talk more.

Best,
Leonard
