Accenture
Spring Internship 2027
Stockholm

Track: AI & Data

Dear Hiring Team,

I'm applying for the AI & Data track of Accenture's Spring Internship. During my internships with IBM Client Engineering, I sat in client workshops and saw how much a good recommendation depends on explaining data clearly to people who aren't data people. That's the part of this role I'm most drawn to.

At Bosch Research, I built a Spark pipeline processing over 30 billion records, and during an internship at IBM Research I designed an evaluation framework for large language models. I like turning messy data into something a client can actually act on.

Would love to talk more.

Best,
Leonard
