Velory
AI & Automation Intern
Stockholm

Dear Hiring Team,

I'm applying for the AI & Automation Intern role. I met Emma Nordin Forsberg and Sebastian Fuchs at the Velory x 46elks x IkonAI hackathon, and after reading through the job description, I think it's a good fit.

For four years I volunteered as a trained paramedic at events, which taught me to stay structured and calm when things get chaotic. I also fly planes in my free time. On the technical side, I maintain Hippo Codes on my own, including its CI/CD pipeline.

Would love to talk more.

Best,
Leonard
